Our key to success is total commitment to customer satisfaction based upon our proven ability to understand, anticipate and exceeds the needs and expectations of our customers. Our policy of quality control is applicable at every stage of manufacturing. Our highly experienced team of management along with technologists and skilled manpower speaks of our strength. Each player is a specialist and absolutely committed to the system for providing excellent product for a wide range of industries and ensuring optimum solutions each time.

MANUFACTURING :

Our modern production devices, precise inspection instruments, testing & quality control facilities designed to analyze physical, mechanical & chemical controls are of latest in technology. Our in house facilities for manufacturing of dies as per customer specifications and drawings are controlled through the computers with the help of CAD/CAM , CNC machining center .Our sophisticated handling and finishing equipment's are of latest concepts and we are equipped with most modern direct chill casting facilities for our foundry, where billets are made as per customers specification. On these basis

TOOL ROOM :

The die making facility is one of the most advanced in house facilities which is equipped to produce precise results both in a complicated design or a standard model design. The CAD centre is equipped with the advanced CNC machines.

Our PROFILE

SAP-Limited a professionally managed company established in the year 2009 located at IDCO Plot No. 1/4 & 1/4/1 Sarua Industrial Estate, Khurda, Bhubaneswar, the capital of state of Odisha, deals with a wide range of aluminium profiles including anodizing and powder coating. We are offering products that meet the stringent quality norms at most competitive price. Our production range includes Architectural Sections e.g. Building Door & Windows, Curtain walling, cladding, hardware etc, the Transport sections used in building commercial Vehicles, Containers, Buses and Railways and Industrial Profiles which are designed & produced to a very wide range like lighting technology, industrial fencing, refrigeration, electronics, transportation, defence, agriculture, aeronautics,hydraulics and construction etc

SAP-Limited is dedicated to provide solutions to the Aluminium Extrusion market and changing demands of our discerning customers. Our philosophy is to provide premier quality products at reasonable price to meet the customer satisfaction. It is the quality of work that determines our success.

Why Choose Us

The latest technological advancements in the industry:

As a company, we develop quality products using the latest technology available on the market. Our separate team looks into this issue to make sure we are moving in the right direction.

Our Vision

Our goal is to be a customer-focused organization. Providing a quality product for our customers, a value for their investment, and a positive outcome for their construction project is critical.

It is around this concept of customer-centricity that our processes and strategies are crafted. Essentially, we ask ourselves what value addition is for the customer, the guiding principle for deciding our priorities.

Incorporating long years of industry experience with current values, SAPL ALUMINIUM LIMITED shows innovation, reliability, and sustainability. The SAPL adheres to the latest standards of customer responsiveness, business culture, workplace safety, ecological responsibility, and TMT product certification.

Our Mission

The relentless pursuit of creating superior shareholder value while exceeding customer expectations profitably, unleashing employee potential, while being a responsible corporate citizen and adhering to our values.

EXCELLENCE THROUGH QUALITY

INNOVATION AND TECHNOLOGICAL DEVELOPMENT

INTEGRITY

SAFETY

Quality Control

It is a set of procedures used to verify that a product meets its manufacturing specifications. There are tests conducted on both manufacturing procedures and final products.

Investor Relations

The Investor Relations Manager assists with publicizing new information, responding to inquiries and meetings, providing feedback to management, and managing crises.
